Comment Sheet

U.S. EPA is interested in your comments on the cleanup alternatives indicated in the Proposed Plan. U.S. EPA will consider public comments before selecting a final cleanup remedy for the Himco Dump Superfund site. Please use the space below to write your comments, then fold and mail this form. Comments must be postmarked by May 12, 2003. If you have any questions about the comment period, please contact Stuart Hill at (312) 886-0689, or through U.S. EPA's toll-free number at 1-800-621-8431. Those with electronic capabilities may submit their comments to U.S. EPA via the Internet at the following e-mail address: hill.stuart@epa.gov.

Since we have lived in our home, this address, we have had nothing but very bad water. It is very unpleasant tasting and malodorous, rusty and at times visibly dirty (black). At times, we buy our own bottled water, suitable for drinking. Despite the fact we have a water conditioner, our water remains most unsuitable tasting and stinky. I feel sure that this is due to being so close to Himco landfill. I worry about our health and the health of those affected by this, if we must continue using this water. I can't help but think that contaminants can and do seep into our system.

I certainly would not be opposed to hooking up to city water. I think it would be in the best interest of all families affected by this. At least we could rest knowing that our water supply is safe.

I have had tasting water since it tested for bacteria. It is O.K. But I would not object to hooking up to city water. No water gets to smelling like rotten eggs so I have to have a plug in a drain with hot water tank. I had to put in a carbon tank for odor and have to replace that cartridge every so often. I would imagine people down on Silver St. Hallie Rd said "I'm affected". How come you haven't sent letters back that way? I know the city right behind me has been affected and had lots of problems on Silver. People next door south of me and across from here have had problems and hooked up to city water so would not have much further to go to me with it.

I live on County Road 916 in the
Himco area - we have a well next to
this line on what is the City. At this time
the City is bringing water from the
air port area where the road from there.
Since they are putting down in this area
I think we should be given the chance to
at least get a City water - This would
be cheaper now than to do later and we
would have safe water.

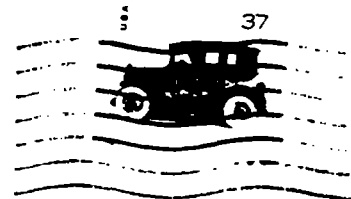

When these things happen the EPA
wants to know much health damage is
done and for these people there is no hope.
